

Writing / Drawing on A Screenshot or Video

- If you write or draw over a playing video, the audio will be muted but the video will continue to play.
- Screenshots are enabled when you install third-party apps on the display.
- You can disable or enable screenshots by creating a remote execution command and deploying the command to displays. See [Enabling and disabling acetates in apps](#).

To write or draw on a screenshot

1. Pick up one of the display's pens.
2. Use the pen to write or draw in digital ink. The screenshot appears as a striped semitransparent layer.

3. When you're done, tap **Close** or **Back** in the command bar to save or close the screenshot.
