

How to Image a Windows Device

Connect device to power and Internet and power on

Press F12 repeatedly until the system settings

Select the USB flash drive

Once completed all steps- remove flash drive Type EXIT and press enter key

Leave device on until completely finished will be at login screen.

*If device is not in intune or doesn't go to login screen (just sits at the Country screen) then send Ricky a message. Be prepared to possibly have to bring in.
